# SUMMER SCHOOL

Law and Technology  
**1 - 5 JULY 2019**  
University of Genoa

The EUSPACE Summer School is a multi-disciplinary project financed by the European Union, Erasmus Plus Jean Monnet Programme, that aims at giving an analysis of the current main legal and technical issues related to the intervention of the European Union in space.

The venue will be the city of Genoa, located on Italy's north-western coast, easily reachable via Genoa airport. The initiative aims to attract researchers and young professionals in law, political science and engineering, as well as doctoral and post doctoral students dealing with the space sector.

Precisely the participation is opened to students who have attended at least a three years' study university course in the above-mentioned topics.

Students who will attend at least 80% of the lessons will be provided with an attendance certificate by the organisation. Moreover, within the programme a Workshop involving the active participation of students is forecast in order to stimulate their knowledge of the topic.

The speakers will be academics from the University of Genoa and other Universities as well as operators in the field of space industries and institutions. Particularly relevant is the participation of representatives of the European Space Agency and the Italian Space Agency.

This year the main topic will be “**International Cooperation as Key Principle in Space Activities**”.
